## PROFESSIONAL SUMMARY

Entry-level IT professional with hands-on experience in web development, software testing, AI automation, and low-code application development. Experienced in building internal business tools and automation workflows using technologies such as HTML, CSS, JavaScript, React.js, PHP, Tailwind CSS, n8n, and API integration. Strong problem-solving, adaptability, and willingness to learn, with practical experience working independently and collaboratively on real-world projects.

## WORK EXPERIENCE

### Complete Development (CoDev)

Aug 2025 - Dec 2025

Software QA Tester Intern

- Created and executed test cases to verify application functionality and ensure features met requirements.
- Monitored Jira for newly reported defects and created detailed bug reports with reproduction steps, expected results, actual results, and supporting evidence.
- Performed functional and regression testing to identify issues and verify fixes.
- Maintained defect records and updated the bug tracking database based on testing results.
- Collaborated with developers and supervisors to clarify issues, verify fixes, and improve software quality.

### Luna AI Systems

Feb 2026 - Jun 2025

IT Intern

- Developed 5+ AI-powered automation workflows using n8n, OpenAI, Claude, and third-party APIs to streamline internal business processes and reduce repetitive manual tasks.
- Built automated workflows integrating AI/LLMs, APIs, databases, messaging platforms, and productivity tools.
- Developed a multi-platform social media scheduling system supporting automated content posting across messaging and social platforms.
- Built a full-stack payroll management application with automated salary computation using Supabase for authentication and database management.

## EDUCATION

### Cebu Technological University - Moalboal Campus

Sept 2021 - June 2026

Bachelor of Industrial Technology Major in Computer Technology

Thesis / Research

#### Integration of Fingerprint and Voice Authentication for an Advanced Motorcycle Security System

Group Leader

- Developed a dual-biometric motorcycle security prototype integrating fingerprint authentication and smartphone-based voice commands. Used Arduino Uno, Bluetooth communication, fingerprint sensors, and relay modules to control the motorcycle ignition and starter system. Implemented multi-layer authentication and an alarm mechanism to help prevent unauthorized access and improve motorcycle security.

## FEATURD PORJECTS

### Helpdesk AI Assistant

n8n | AI/LLM | Telegram Bot API | Google Sheets | JavaScript

- Built an AI-powered helpdesk automation system that enables users to report, manage, and retrieve support issues through a Telegram interface.
- Implemented AI intent classification and structured data extraction to automatically process issue requests.
- Added duplicate issue detection and automated unique issue ID generation to improve issue tracking accuracy.
- Integrated Google Sheets as a lightweight issue management database for storing and updating ticket information.

### AI Clinic Assistant (SmileCare AI)

AI Automation | n8n | Ollama | Telegram Bot API | Airtable | AI/LLM

- Developed an AI-powered clinic assistant that automates patient interactions and appointment-related requests through Telegram.
- Integrated an AI/LLM workflow with structured output processing to extract and process appointment and patient information.
- Built automated patient data management using Airtable, including patient identification, Telegram user data, and record tracking.
- Designed the workflow around clinic operating hours, appointment slot durations, and conversational context to support automated clinic operations.

## SKILLS

**AI & Automation:** n8n, OpenAI API, Claude, Ollama, AI/LLM Integration, Workflow Automation, API Integration, Go High Level

**Frontend:** React.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS

**Backend & Databases:** PHP, JavaScript, Node.js, Express.js, Supabase, MySQL, AI/LLM Integration

**Programming & Testing:** Python, C#, SQL, Selenium, Playwright, Cypress

**Tools & Platforms:** Git, GitHub, Postman, VS Code, Docker
